In Texas, a state fund to subsidize gas plants could undercut the battery boom. In other states, complex regulations sometimes prevent utilities

CHARLOTTE, N.C. - Duke Energy Renewables, part of Duke Energy's Commercial Businesses, announced today the completion of its 36-megawatt (MW) energy storage and power management

Texas is poised to overtake California as the state with the largest energy storage market in the country as U.S. makes record-breaking installations.

Enel North America has more than tripled its operational utility-scale storage capacity this summer by bringing five new battery energy storage

A new analysis from the American Clean Power Association (ACP) highlights how the rapid addition of energy storage capacity in Texas, as well as renewable resources, has kept energy costs low for

Texas has rapidly expanded its energy storage capacity, setting

As energy needs continue to grow, the successful launch of these three battery storage projects marks a significant step forward in Texas' energy landscape. With a concerted effort to bolster storage

The Future of Energy Storage in Texas Energy storage is a key component of Texas' renewable energy ambitions. By buffering intermittent power sources like wind and solar, storage

Concluded in May 2023, the assignment assessed available energy storage technologies, evaluated the role of energy storage in the current grid conditions, identified potential storage locations, analysed

Gambit Energy Storage facility is a state-of-the-art battery energy storage system that helps ensure power reliability in the ERCOT market. The facility is located

Dhakatexas energy storage

This summer, industrial scale batteries have helped boost the energy supply during critical evening hours. Battery storage represents a small fraction

Energy storage is an idea that dates back over two thousand years. Engineers, investors, and politicians are increasingly researching energy storage solutions in response to growing concerns about fossil

Energy experts say the growth in battery storage has helped Texas build a more resilient power grid after the state saw deadly blackouts during a 2021 winter storm.

The growth of hybrid energy systems that combine storage technologies with wind and solar generation assets is expected to continue gaining traction in Texas. Incorporating energy

Renewables and energy storage have provided the vast majority of new generating capacity in Texas and now account for nearly 50% of ERCOT's
