Given Zambia's continually growing power needs, for commercial and residential use, and ability to export through the Southern Africa Power Pool, there are significant investment

Distribution of wind potential Annual generation per unit of installed PV capacity (MWh/kWp) Wind power density at 100m height (W/m<sup>2</sup>)

Revised in November 2025, this map provides a detailed view of the power sector in Zambia and cross-border power interconnectors serving the Copperbelt in Zambia and DR Congo.

Zambia is potentially self-sufficient in sources of electricity, coal, biomass and renewable energy. The only energy source where the country is not self-sufficient is petroleum energy.

Data for power plants in Zambia with total installed generating capacity 10 mw from the Platts World Electric Power Plants Database (WEPP 2006).

Choc Zambia jest kojarzona przede wszystkim z hydroenergetyką, w ostatnich latach wzmocniła segment elektrowni ciepłych. Najważniejszym projektem jest Maamba Collieries Power

Zambia's energy resources include electricity (hydropower), petroleum, coal, biomass and renewable energy. It is only petroleum which is wholly imported in

Backed by policy reforms and public-private partnerships, the country is attracting independent power producers and expanding off-grid solar

The government is committed to implementing energy sector reforms to enable increased private sector participation and diversify electricity generation sources to mitigate against climate change risks

Biomass power in Zambia is exemplified by the Nakambala station, a 40 MW bagasse-fired cogeneration

# Stacja bazowa naziemna Zambia Power

facility owned by Zambia Sugar Plc in Mazabuka District, Southern Province.
